

Case Study

Industrial Users

Project: New Warehouse Facility
Client: Commodities Centre
Product: Narrow aisle Pallestor
Material Stored: Foodstuffs

Brief: Maximum capacity with 100% accessibility.

The client required a high density, fully accessible design to accommodate a wide range of stored items. The mix of storage changes on a regular basis, necessitating a fully-adjustable pallet racking system.

The specification of the forklift trucks was crucial to our design and they were carefully chosen by Compact Storage to ensure that every aspect of the client's operation was successfully accommodated.

Taking time to understand our client's needs has resulted in additional projects being undertaken and several referrals leading to further work.
